

Delphin Technology AG – List of Patents

Condition Monitoring

Condition monitoring of technical processes

European Patent Number: 1533669 A1

Expert Key

Measurement data acquisition equipment and their operating processes

European Patent Number: 2117124

Process Automation

European Patent Number: 1035459

ProfiSignal Klicks

System for controlling and operating technical processes

European Patent Number: 157514

Message Devices

Measurement value acquisition device

German Patent Number: DE 44 41 445

Condition Monitoring

System for Tracking and Assessing Changes in Technical Processes

United States Patent Nr. 6,959,261 B2

RE 02/03 US

Condition Monitoring

Condition Monitoring in Technical Processes

United States Patent Nr. 7,113,871

Condition Monitoring

State monitoring of Machines and technical installations

United States Patent Nr. 11/843,796

K570471

Expert Key, Message-Geräte

Measurement Data Acquisition Apparatus and Method of Operation

United States Patent Nr. 7,773,015

ProfiSignal Klicks

System for Automation of Technical Processes

United States Patent Nr. 7,474,925 B2

ProfiSignal Klicks

System for Automating, Monitoring and Controlling Technical Processes and Acquiring Measurements thereof

United States Patent Nr. 7,127,303 B2

ProfiSignal Klicks

Controlling and Operating Technical Processes

United States Patent Nr. 7,620,459

ProfiSignal Klicks

Input of Program Instructions in Imperative Programming Languages

United States Patent Nr. 8,132,146 B2

ProfiSignal Klicks

System and Method of Producing Computer Programming

United States Patent Nr. 7,685,564
